Summary

With over 5 years of experience in frontend development, specializing in optimizing application performance for e-commerce. Proficient in TypeScript, React, and Next.js, I have had the privilege of leading teams and contributing to the establishment of efficient working processes and architectural solutions for successful projects. Additionally, I occasionally contribute to open-source projects, offering support and expertise as needed.

Technologies

General: HTML, CSS, TypeScript, React, Next.js, AWS

Tooling: eslint, prettier, profilers

Other: redux, react-query, material-ui, node.js, jenkins CI

Experience (5 years, 6 months)

Team Lead / Senior Software Engineer at Grid Dynamics   May 2021 — July 2023

- Led a team of 10 engineers to revamp an outdated warehouse planogram app, reducing load speed from several minutes to hundreds of milliseconds.

- Utilized webpack module federation to seamlessly integrate the app within a larger warehouse ecosystem.

- Guided a team of 4 engineers in successfully transitioning an eCommerce marketplace application from client-side to server-side, resulting in remarkable improvements in page speed loading. Achieved a boost from 16 to 65 points on desktop and a remarkable increase from 1 to 35 on mobile devices.

- Prepared a strategy to migrate website from the old app to a new app utilizing AWS load balancer.

Middle Frontend Engineer at Tennisi   June 2019 — May 2021

- Transitioned the application from JavaScript to TypeScript and implemented Immutable.js to significantly improve data structure handling speed.

- Collaborated with the backend team to rewrite and restructure the API for better performance and optimized frontend data processing

Frontend Engineer at ZoomTools   October 2017 — March 2019

- Developed and maintained a variety of projects, with a focus on React, Redux, Webpack, React Native, and Next.js.

- Built web applications from scratch, transforming Figma mockups into fully functional pages and components using React and Next.js.
